

VII. CONDOR II MISSILE

o The Condor II ballistic missile program of the Argentine Air Force is an international effort underway in Argentina and involving Middle Eastern financial support and West European technology. Latest information suggests that the program is encountering serious problems and delays.

o We have repeatedly urged European allies to crack down on transfers of crucial controlled technology and believe these demarches have helped stall development

[REDACTED]

o [REDACTED]

o GOA public position is that Condor II is a space launch vehicle with no military mission.
